TrueNet® Communications
A 1Finity Company

NETWORK INFRASTRUCTURE SOLUTIONS

THE WORKFORCE BEHIND

America's Digital Infrastructure

TrueNet delivers end-to-end network infrastructure solutions that connect data centers, cloud platforms, edge facilities, carrier networks, and enterprise environments. From network strategy, engineering, and design through deployment, integration, testing, commissioning, and operational readiness, we provide the expertise required to build, validate, and activate mission-critical digital infrastructure at scale.

Our Network Infrastructure Capabilities

01 ENGINEERING

- Requirements Analysis
- Digital Data Collection
- Network Planning
- OSP / ISP Design
- Route Diversity
- Capacity & Connectivity Strategy

02 CONSTRUCTION

- OSP Construction
- Carrier Entrances
- Fiber Infrastructure
- ISP Construction
- Structured Cabling

03 INTEGRATION

- Carrier Connectivity
- Data Center Interconnect
- Rack & Stack
- Equipment Deployment
- Test & Turn-Up

04 VALIDATION

- Fiber Characterization
- Testing & Certification
- Network Validation
- Operational Readiness
- Day Two Support

SERVING: Data Centers | Cloud Infrastructure | Carrier Networks | Edge Facilities | + More

Supporting digital infrastructure projects from **Engineering** through **Operational Readiness**.

Built for High-Demand Digital Infrastructure

- Proven expertise in complex infrastructure deployments
- Scalable workforce for hyperscale and colocation deployments
- Built to deliver within mission-critical timelines
- National diverse workforce to meet your needs
